Your expert partner in

Biopharmaceutical Clinical Research

Winicker Norimed

Winicker Norimed GmbH
Clinical Research

Deutschherrnstraße 15-19
D-90429 Nürnberg

Expert partner for clinical trials and non-interventional studies with biologics

10+
Clients (Industry & academic)

20+
products & areas of application

30+
Studies (National/ international)

2.000+
Study Sites

18.000+
Patients

Trusted partner for clinical trials and non-interventional studies with biologics — in national and international settings.

Recombinant, humanized and fully human monoclonal antibodies

- Chronic inflammatory diseases of the CNS
- Rheumatological and immune-mediated skin disorders
- Degenerative diseases of the macula
- Carcinomas in various organ systems

Biotechnologically derived natural compounds, such as antimycotics

- Chronic inflammatory diseases of the CNS
- Carcinomas in various organ systems

Innovative adoptive cellular therapies (ACT) and mRNA-based cancer vaccines

- Various solid tumor indications

Biologics are playing an increasingly important role in the treatment of cancer and other severe diseases. Our experience helps ensure that innovative biological therapies reach patients safely, effectively, and successfully.

Proven success in biotech projects

We support biotech projects under demanding conditions — with the flexibility, speed, and operational focus that lean organizations need.

Experiences / Strenghts:

- We translate our clients' scientific questions into measurable and analyzable study objectives.
- We respond flexibly to changing conditions and develop constructive solutions to keep studies on track and achieve their objectives.

- We look beyond the initial request to understand which decisions the study is expected to support.
- We contribute statistical input from protocol development through analysis and reporting, rather than only at the end of the process.
- We provide statistical support that is adaptable to study complexity, changing timelines, and different stages of development.

Whether you need strategic input, operational support, or expert guidance — we act as an extension of your team.

Tailored support across the project lifecycle

Study planning & consulting

- Structured planning & preparing, tailored to biologics and biotech projects
- Fit-for-purpose support aligned with lean structures, project needs, and internal resources
- Close coordination with sponsors, investigators, and study sites to ensure an efficient project start.

Study conduct & reporting

- Dedicated operational support for sponsors, investigators, and study sites
- Ongoing oversight to maintain quality, timelines, regulatory requirements, and feasibility
- High-quality data and structured support to strengthen insights into safety, efficacy, and treatment patterns.

Biostatistics & Medical Writing

- Support for analysis, reporting, and publication activities to ensure consistent results communication.

In addition to our expert knowledge in terms of content and our many years of experience, we offer you the advantages of a medium-sized full-service CRO.

You can count on us – just like various clients from the areas of pharma, biotechnology and medical devices already do!

What we offer

- A highly qualified and experienced team
- Independent work in close coordination with the client
- Strict adherence to timelines − we know this is essential
- Willingness to take on new challenges
