Winicker Norimed

Winicker Norimed GmbH
Clinical Research

Deutschherrnstraße 15-19
D-90429 Nürnberg

Professional statistical consulting for clinical research and beyond

Fast. Flexible. Reliable. Since 1993.

We are a full-service CRO with over 30 years of experience in statistical consulting and biometric analysis. Our team of nine highly qualified experts supports pharmaceutical companies, medical device manufacturers, diagnostics developers, and academic institutions with tailor-made statistical solutions.

Whether you need support for study planning, data analysis or publication – we are your reliable partner for every phase of your project.

Tailor-made support for your research needs

Biostatistical planning & consulting

- Personalized support from a dedicated biostatistician
- Study protocol development and review
- Definition of clinical endpoints, design (e.g. crossover) and statistical methods
- Sample size estimation and power analysis
- Randomization strategies (e.g. stratification)
- Adaptive analysis strategies
- Managing missing data (including imputation methods and sensitivity analyses)

Statistical analysis & programming

- Validated statistical analyses using SAS and R
- CDISC-compliant data formats (e.g. SDTM and ADaM)
- Interim analysis (e.g. in sequential trials) and DMC support
- HTA analysis and Real World Evidence (RWE) evaluations
- Meta-analysis and integration of diverse data sources

Advanced methods

- Survival and time series analysis
- Linear regression, analysis of variance, repeated measures analysis, correlation analysis
- Logistic models, propensity scores, non-parametric analysis, adaptive analysis strategies, multiple comparison methods
- Forecasting and probability modeling

What you can expect

Clear, actionable results

- Comprehensive reports with detailed methodology, results, and interpretation
- Informative tables and figures for presentations and publications
- Graphical presentation of results tailored to your audience

Medical writing & documentation

- Statistical input for clinical study reports
- Statistical review of protocols and manuscripts
- Support for publication strategies and regulatory responses

Flexible collaboration

- Short-term availability for urgent requests
- Fast, responsive communication and reliable timelines

One contact person – full support

You'll work with a dedicated biostatistician who understands your project and guides you through every step – from planning to final analysis.

Your success is our mission

- Over 30 years of experience in clinical research and statistics
- A team of 9 biostatisticians with deep domain knowledge
- Hundreds of successful projects across various therapeutic areas
- Proven expertise in handling complex data and regulatory requirements
- Highest client satisfaction and successful collaborations with our partners

We turn your data into insights – and your insights into impact!
